

# Computerized Tests

## *Completed via the Electro-dermal Method*

- 1. Food Sensitivity Test:** This test checks approx. 120 food items as well as the Candida Albicans level. \* [Can also do the Candida Albican Test on its own]
- 2. Environmental Test:** This test checks approx. 24 collections of allergens and 39 individual allergens.
- 3. Hormone Test:** This test measures the levels/amount (range low to high) of hormones present in the body. The hormones tested include: HGH, Thyroxin, DHEA, Cortisol, Melatonin, Estrogen, Progesterone, Testosterone and Pituitary.
- 4. Virus Test:** This test determines whether there are any viruses present that may be causing body ailments.
- 5. Vitamin/Mineral Test:** This test checks for any nutritional deficiencies in vitamins and minerals. \* [Can also do either one (Vitamin **OR** Mineral) on their own]
- 6. Dental Test:** This test checks for amalgam leakage and checks each tooth for blockages that may be causing ailments.
- 7. Energy Screening Test:** This test measures the body's regulation patterns to determine whether they are over- or under-active.
- 8. Parasite Test:** This test checks for specific parasites (already programmed into the machine).
- 9. Enzyme Deficiency Test:** This test checks for specific enzyme deficiencies.
- 10. Heavy Metal Test:** Heavy Metal contamination contributes to ~ 80% of all diseases and blocks therapeutic measures. This test checks for any heavy metal accumulation in the body. This tests ALL heavy metals. \* [Can also do a urine test for testing heavy metals]
